Personal Data

Date of birth February 15th, 1978
Place of birth Thessaloniki
Military duty Fulfilled (from 13/02/2006 to 13/02/2007)

Education

- 2006 **PhD**, Department of Electrical and Computer Engineering, Aristotle University of Thessaloniki, Greece.
- Dissertation: "Development of optimized higher-order finite-difference schemes for the accurate solution of electromagnetic problems in the time domain".
 - Supervisor: Prof. Theodoros Tsiboukis.
 - Grade: "Excellent".
 - Awarded: 24/03/2006.
- 2000 **Diploma (five-year)**, Department of Electrical and Computer Engineering, Aristotle University of Thessaloniki, Greece.
- Admission: 1995.
 - Graduation: 13/07/2000.
 - Diploma grade: 8.40 ("Very good").
 - 10th among 191 students.
- 1995 **Admission** to the Department of Electrical and Computer Engineering, Aristotle University of Thessaloniki, Greece.
- Ranking 9th, after national exams.
 - High-school diploma, 19 6/10 ("Excellent").

Academic employment

- July 2013 – today **Assistant Professor**, Department of Informatics and Telecommunications Engineering, University of Western Macedonia, Greece.
- June 2010 – Sept. 2013 **Lecturer**, Department of Informatics and Telecommunications Engineering, University of Western Macedonia, Greece.
- Oct. 2008 – June 2010 **Contract lecturer (407/80)**, Department of Informatics and Telecommunications Engineering, University of Western Macedonia, Greece.
- Oct. 2008 – July 2009 **Scientific associate**, Technological Educational Institute of Serres, Greece.
- Oct. 2007 – July 2008 **Scientific and laboratory associate**, Technological Educational Institute of Serres, Greece.

- Jan. 2007 **Postdoctoral research associate**, Department of Electrical and Computer Engineering,
– Jan. 2009 Aristotle University of Thessaloniki, Greece.
- Nov. 2000 **PhD Candidate - Researcher**, Department of Electrical and Computer Engineering, Aristotle
– Feb. 2006 University of Thessaloniki, Greece.

Post-doctoral research

- 1/2/2008 Scholarship from the Greek Scholarships Foundation.
- 31/1/2009 ○ Research project entitled: “Hybrid algorithms and supplemental techniques for the generalized application of optimized discretization schemes in complex electromagnetic problems”.
- 1/1/2007 Grant of Excellence, Research Committee, Aristotle University of Thessaloniki, Greece
- 31/12/2007 ○ Research project entitled: “Optimized and hybrid computational finite-difference models for problems with complex electromagnetic and geometric features”.

Undergraduate awards

- 1999 Annual award for excellence as a student (Organization for Telecommunications in Greece).
- 1998 Annual award for excellence as a student (State Scholarship Foundation).

Teaching experience

University of Western Macedonia – Department of Informatics and Telecommunications Engineering

- 2008-2016 **Mathematical Analysis I** (1st semester, compulsory).
**Also delivered to the Department of Mechanical Engineering during 2009-2015.*
Contents: Sets. Real numbers. Sequences of real numbers. Series of real numbers. Real functions of a single variable. Limits and continuity. Derivatives. Application of derivatives. Indefinite and definite integrals, improper integrals. Applications of integration. Power series.
- 2008-2016 **Mathematical Analysis II** (2nd semester, compulsory).
**Also delivered to the Department of Mechanical Engineering during 2009-2015.*
Contents: The \mathcal{R}^n space. Quadratic surfaces. Real functions of several variables. Partial derivatives. Chain differentiation. Directional derivative. Extreme values. Taylor series. Double integrals. Triple integrals. Vector functions. Curves. Line integrals. Differentiation of scalar and vector fields. Conservative fields. Green’s theorem. Surface integrals. Gauss and Stokes theorems.
- 2010-2016 **Applied Mathematics I** (3rd semester, compulsory).
**Also delivered to the Department of Mechanical Engineering during all years.*
Contents: Introduction. First-order ordinary differential equations. Separable equations. Exact equations, integrating factors. Linear equations. Solution via substitution. Higher-order ordinary differential equations. Linear equations with constant coefficients. Order reduction. Solution of inhomogeneous differential equations. Laplace transform and its use for solving differential equations. Series solution of differential equations, ordinary and singular points. Systems of differential equations, solution with the matrix method. Complex numbers. Complex functions. Differentiation of complex functions. Integration of complex functions.
- 2012-2016 **Applied Mathematics II** (4th semester, compulsory).
**Also delivered to the Department of Mechanical Engineering during all years.*

Contents: Introduction to Partial Differential Equations (PDEs). Examples of PDEs. First-order PDEs. Linear, semi-linear, and quasi-linear PDEs. Characteristic curves. The Cauchy problem. Second-order PDEs, classification, standard forms. Eigenvalue problems. The Laplace equation, solution in Cartesian and polar coordinates, cases of homogeneous and inhomogeneous boundary conditions and infinite domains. Orthogonal functions, Fourier series and Fourier integrals. The heat equation, solution in finite and infinite spaces. Special functions. The wave equation, finite and infinite strings.

2011-2015 **Electromagnetic Waves** (5th semester, compulsory) .

**Co-teaching during 2011-2013.*

Contents: Time-varying fields, displacement current, Maxwell's equations, wave equation, retarded potentials, Poynting vector. Plane waves, polarization, propagation. Reflection and transmission. Transmission lines, TEM waves, telegrapher's equations. Waveguides, TE and TM modes, dielectric waveguides. Electromagnetic radiation and antennas, short dipole, half-wavelength dipole, antenna arrays, radiation pattern..

2010-2012 **Signal and System Theory** (4th semester, compulsory).

Contents: Signal and system classification. Elementary signals. Generalized functions. Linear time invariant systems. Convolution. Impulse response. Fourier transform and series. Frequency response. Laplace transform. Transfer functions. Stability. Sampling. Filters.

[Technological Educational Institute of Serres – Department of Informatics & Communications](#)

2008-2009 **Computational Methods in Telecommunications** (Lectures & Lab).

Contents: Introduction to computational methods, finite differences for the Laplace equations, finite differences for the Poisson, diffusion and wave equations, finite elements for one-dimensional problems, method of moments.

2007-2008 **Numerical Methods in Programming Environment** (Lab).

Contents: Methods for equation solving, linear systems, LU factorization, eigenvalues and eigenvectors, numerical integration.

Computational Methods in Telecommunications (Lab).

Wireless Communications (Lab).

Contents: Efficiency of radio-systems, passive reflectors, back-to-back antenna systems, radio-systems with various capacities.

Digital Signal Processing (Lab).

Contents: Introduction to Matlab, basic sequences, transformations of signals, even and odd parts, convolution, system response, computing DFT and DTFT, Z-transform.

[Technological Educational Institute of Serres – Department of Mechanical Engineering](#)

2007-2009 **Electric Machines** (Lectures).

Contents: Basic principles of dc machines, dc generators, dc motors, ac machines, synchronous generators, inductive motors.

[Aristotle University of Thessaloniki – Department of Electrical and Computer Engineering](#)

2001-2005 Teaching assistant for: **Electromagnetic fields I, II, III and IV.**

Contents: static electric fields, inductors and capacitors, static magnetic fields, electromagnetic induction, magnetic circuits, forces on particles, electric flow field, Maxwell's equations, plane waves, reflection and transmission, waveguides, transmission lines, radiation.

Research interests

- Computational Electromagnetics.
Finite-difference methods, finite-element methods, and finite-volume methods for time-dependent electromagnetic fields.
- Finite-difference time-domain methods.
Conventional and non-standard techniques, implicit and explicit algorithms, hybrid schemes, high-order discretization techniques, curvilinear coordinate systems, etc.
- Error minimization and optimized algorithms.
Phase-error reduction techniques, single-frequency or wideband improvement, generalizations to lossy media, separate or simultaneous treatment of space-time errors, optimized temporal integrators, determination of optimum time-step size, interface discretizations, etc.
- Algorithm parallelization on graphics processing units.
Minimization of simulation times, acceleration of explicit and implicit algorithms, implementation of best practices.
- Computational modeling of problems with uncertainties.
Intrusive stochastic FDTD algorithms, polynomial chaos, collocation methods and sparse grids, Monte-Carlo methods.
- Modeling and simulations of realistic problems.
Electromagnetic radiation effects on biological tissues, lightning-induced fields, electromagnetic compatibility problems, metamaterial-nanomaterial and graphene structures, antennas, wireless propagation, etc.

Languages

English Certificate of Proficiency in English, University of Cambridge (Grade: A).

Professional organizations

- Member of the Technical Chamber of Greece since 2000.
- Member of the Institute of Electrical and Electronics Engineers (IEEE).

Computing experience

- Programming languages: C, Cuda.
- Operating systems: WINDOWS.
- Software packages: Matlab, Mathematica, XFDTD, CST, EDX SignalPro.

Publications in international peer-reviewed journals

- [J.38] Georgios G. Pyrialakos, **Theodoros T. Zygiridis**, and Nikolaos V. Kantartzis, "A 3-D polynomial-chaos FDTD technique for complex inhomogeneous media with arbitrary stochastically-varying index gradients," *ACES Express J.*, vol. 1, no. 3, pp. 109–112, Mar. 2016.

Scientific conferences

- The European Conference on Antennas and Propagation (2015, 2017)
- The Biennial IEEE Conference on Electromagnetic Field Computation (2012, 2016)
- The International Conference on Modern Circuits and Systems Technologies (2016)

Participation in conference committees

- 9th European Conference on Antennas and Propagation – EuCAP 2015 (Technical Programme Committee Member).
- International Conference on Modern Circuits and Systems Technologies – MOCAS 2016 (Program Committee).

Research projects – Professional experience

- 11/2000 – 7/2001 **Complete study of the consequences of electromagnetic radiation to embryos of rats and a simulation approach to human and other organisms.**
[Aristotle university of Thessaloniki (A.U.Th.) - General Secretariat of Research and Technology (G.S.R.T.)]
Analysis of specific radiation-interaction problems in living beings, extraction and comparison of results, composition of measurement and simulation archive, justification.
- 11/06/2001 – 10/06/2003 **Measurements of EM field level in the city of Serres, Greece and study of antenna park relocation**
[A.U.Th. - Municipality of Serres]
Project's technical personnel, measurements and extraction of radiation patterns, data process.
- 01/07/2002 – 30/09/2002 **Telecommunications Centre, Aristotle University of Thessaloniki**
[A.U.Th.]
Technical personnel of the Telecommunications Centre, support for distant-learning systems.
- 12/06/2003 – 11/02/2006 **Complete numerical and experimental study of the influence of radiation from contemporary wireless systems on humans.**
[A.U.Th. - G.S.R.T.]
Numerical simulation of various types of antennas, software development.
- 01/10/2003 – 31/12/2003 **Reformation of the current undergraduate study program of the department of Electrical and Computer Engineering**
01/09/2005 [A.U.Th. - Ministry of Education & Religious Affairs]
– 30/11/2005 Development of electronic educational material for the courses of “Electromagnetic Field” and “Special Topics of Electromagnetic Field”.

- 01/01/2004 **Measurements of electromagnetic and acoustic power density.**
 – 31/01/2004 [Research Committee A.U.Th.]
 26/03/2004 On-site and lab measurement at RF and microwave frequencies, including power density,
 – 30/04/2004 antenna gain, electromagnetic shielding, and scattering parameters.
 01/02/2006
 – 07/02/2006
- 06/06/2007 **Advanced services of distant learning of T.E.I. of Serres**
 – 15/09/2007 [Technological Educational Institute of Serres]
 Development & support of advanced telematics services for higher education. Production of
 electronic educational material for the theoretical courses PHYSICS I and PHYSICS II, which
 are taught at the Department of Informatics and Communications.
- 01/04/2009 **Complete simulation and electromagnetic compatibility investigation of the electronic**
 – 30/09/2010 **systems of conventional and hybrid electric vehicles**
 [Technological Educational Institute of Thessaloniki]
 Simulation (design and analysis) of electronic vehicular components and study of their
 interactions with the electromagnetic surroundings.
- 2011–today **Internship program, Department of Informatics and Telecommunications Engineering**
 [University of Western Macedonia]
 Supervision of undergraduate students.
- 01/06/2015 **Irakleitos II - central actions for doctoral studies**
 – 30/09/2015 [A.U.Th. - European union and national funds]
 Project evaluation at Aristotle University of Thessaloniki.
- 26/09/2012 **Advanced computational modeling and applications for innovative materials and**
 – 30/09/2015 **structures (“ΑΡΙΣΤΕΙΑ Ι”)**
 [A.U.Th. - European union and national funds]
 Advanced numerical techniques in the time domain, graphene, parallelization and
 development of algorithms on graphics processing units, micro-electromechanical systems,
 metamaterials. (Budget: 300,000€).

Scientific committees for phd students

- Supervisor of one (1) PhD candidate:
 - Christos Salis, “Efficient computational methods for the solution of electromagnetic problems with uncertainties,” University of Western Macedonia (Sept. 2014 - today).
- Currently serving as an Advisory Committee Member for one (1) PhD candidate:
 - Georgios Pyrgialakos, “Design of combined metamaterial-graphene structures with adaptive properties and optimum performance,” Aristotle University of Thessaloniki (Sept. 2014 - today).

- Served as an Examination Committee Member for four (4) doctoral theses:
 - Konstantinos Rallis, “Electromagnetic study of underground conductors,” *PhD dissertation*, Department of Mechanical Engineering, University of Western Macedonia, Kozani, 2012.
 - Chrysovalantou Ziogou, “Modelling, optimisation and control of integrated PEM fuel cell systems,” *PhD Dissertation*, Department of Informatics and Telecommunications Engineering, University of Western Macedonia, Kozani, Greece, 2013.
 - Harikleia-Haritini Voulgaraki, “Study of excitation for a SQUID magnetometer in non destructive testing applications,” *PhD dissertation*, Department of Mechanical Engineering, University of Western Macedonia, Kozani, December 2014.
 - Athanasios Sfikas, “Development of a water pollution prediction model using a multi-parameter sensors network,” *PhD dissertation*, Department of Informatics and Telecommunications Engineering, University of Western Macedonia, Kozani, Sept. 2015.

Supervision of diploma theses

Supervisor of eight (8) completed diploma projects and three (3) more in progress:

- E. Magganopoulou, *Operation control of modern antennas using metamaterials*, June 2016.
- C. Livas, *Parallelization of a finite-difference algorithm for acoustic problems*, Feb. 2016.
- P. Giannakeris, *Realization of the compact FDTD method for waveguide problems*, July 2015.
- A. Terzidou, *Simulation study of the effect of electromagnetic radiation on human biological tissues*, July 2015.
- K. Minas, *Computational solution of the telegrapher equations with high-order approximations for the study of transmission line problems*, July 2014.
- G. Stylianou, *Acceleration of the two-dimensional FDTD method with CUDA and applications in the study of wireless networks*, Mar. 2014.
- N. Koutsou, *Computational study of smart antenna systems*, Oct. 2013.
- P. Valsamas, *Computational study of contemporary antennas for wireless communication configurations*, Oct. 2013.

Administrative duties

- 2016–today Member of the Temporal General Assembly of the Department of Informatics and Telecommunications Engineering.
- 2010–2013
- 2015 Member of the Academic Matters and Personnel Committee of the University of Western Macedonia. Also participated in workgroups with the following responsibilities:
 - Organization and supervision of undergraduate study programs.
 - Decisions on instructors, length of academic year and examination periods.
- 2014–today Committees of Admission Exams from other Universities/Institutes.
 - Department of Informatics and Telecommunications Engineering (2014,2015).
 - Department of Environmental Engineering (2015).
- 2012–today Responsible for preparing and editing the formal Study Guide of the Department of Informatics and Telecommunications Engineering.
- 2011–today Member of the Internal Evaluation Committee, Department of Informatics and Telecommunications Engineering.

2011–today Member of various committees, Department of Informatics and Telecommunications Engineering:

- Committee for the evaluation of temporary teaching staff (2011-today).
- Academic Planning Committee.
- Committee for supply receipt and work confirmation (2011-today).
- Committee for investigating the violation of written examination rules (2014).
- Committee for the valuation of applications for contributory scholarships (2012-2013).
- Committee for the evaluation of applications for PhD studies (2013).
- Committee for equipment disposal (2012).
- Committee for the evaluation of applications of transferred student (2010-2011).

2010–today Participation in several University committees for public tender.

2013 Responsible for preparing the regulations for conducting written exams at the Department.

2011 Responsible for preparing the regulations for the Department's doctoral studies program.
